EasyBuild @ CSCS: Current status and roadmap

EasyBuild Workshop

Guilherme Peretti-Pezzi, CSCS

September 8th, 2015

Outline

- EasyBuild setup @ CSCS
- Proposed workflow
- Jenkins integration
- Final thoughts & questions

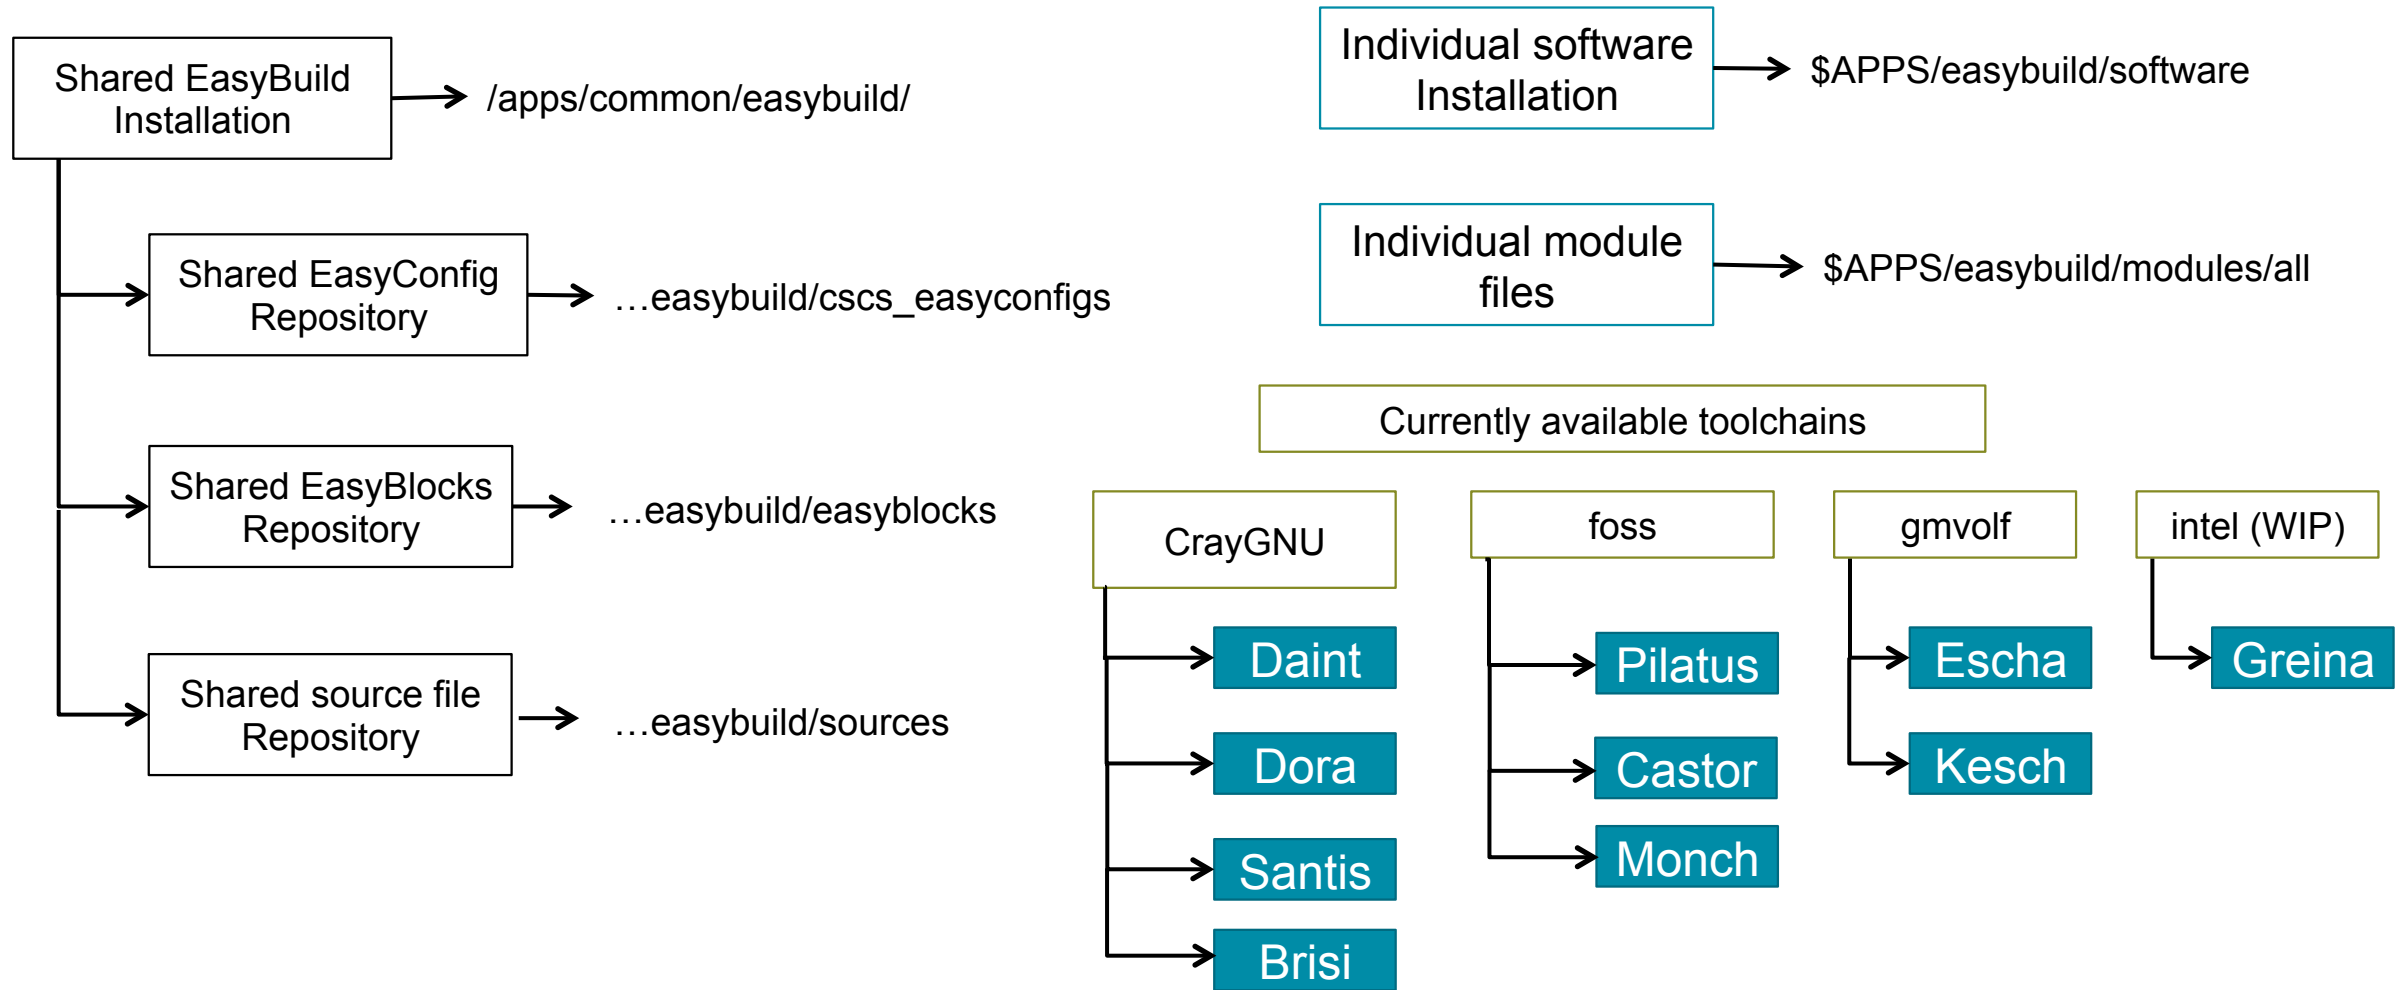

Some of the stock EasyBuild toolchains

- ClangGCC: Clang, GCC
- CrayCCE: PrgEnv-cray, fftw
- **CrayGNU: PrgEnv-gnu, fftw**
- CrayIntel: PrgEnv-intel, fftw
- GCC: GCC
- cgmppich: Clang, GCC, MPICH
- cgmvapich2: Clang, GCC, MVAPICH2
- cgompi: Clang, GCC, OpenMPI
- **dummy: (system libs and compilers)**
- **foss: BLACS, FFTW, GCC, OpenBLAS, OpenMPI, ScaLAPACK**
- gcccuda: CUDA, GCC
- **gmvapich2: GCC, MVAPICH2**
- gmvolf: BLACS, FFTW, GCC, MVAPICH2, OpenBLAS, ScaLAPACK
- gompic: CUDA, GCC, OpenMPI
- gpsolf: BLACS, FFTW, GCC, OpenBLAS, ScaLAPACK, psmpl
- iccifort: icc, ifort
- ictce: icc, ifort, imkl, impi
- **intel: icc, ifort, imkl, impi**
- iomkl: OpenMPI, icc, ifort, imkl
- iqacml: ACML, BLACS, FFTW, QLogicMPI, ScaLAPACK, icc, ifort

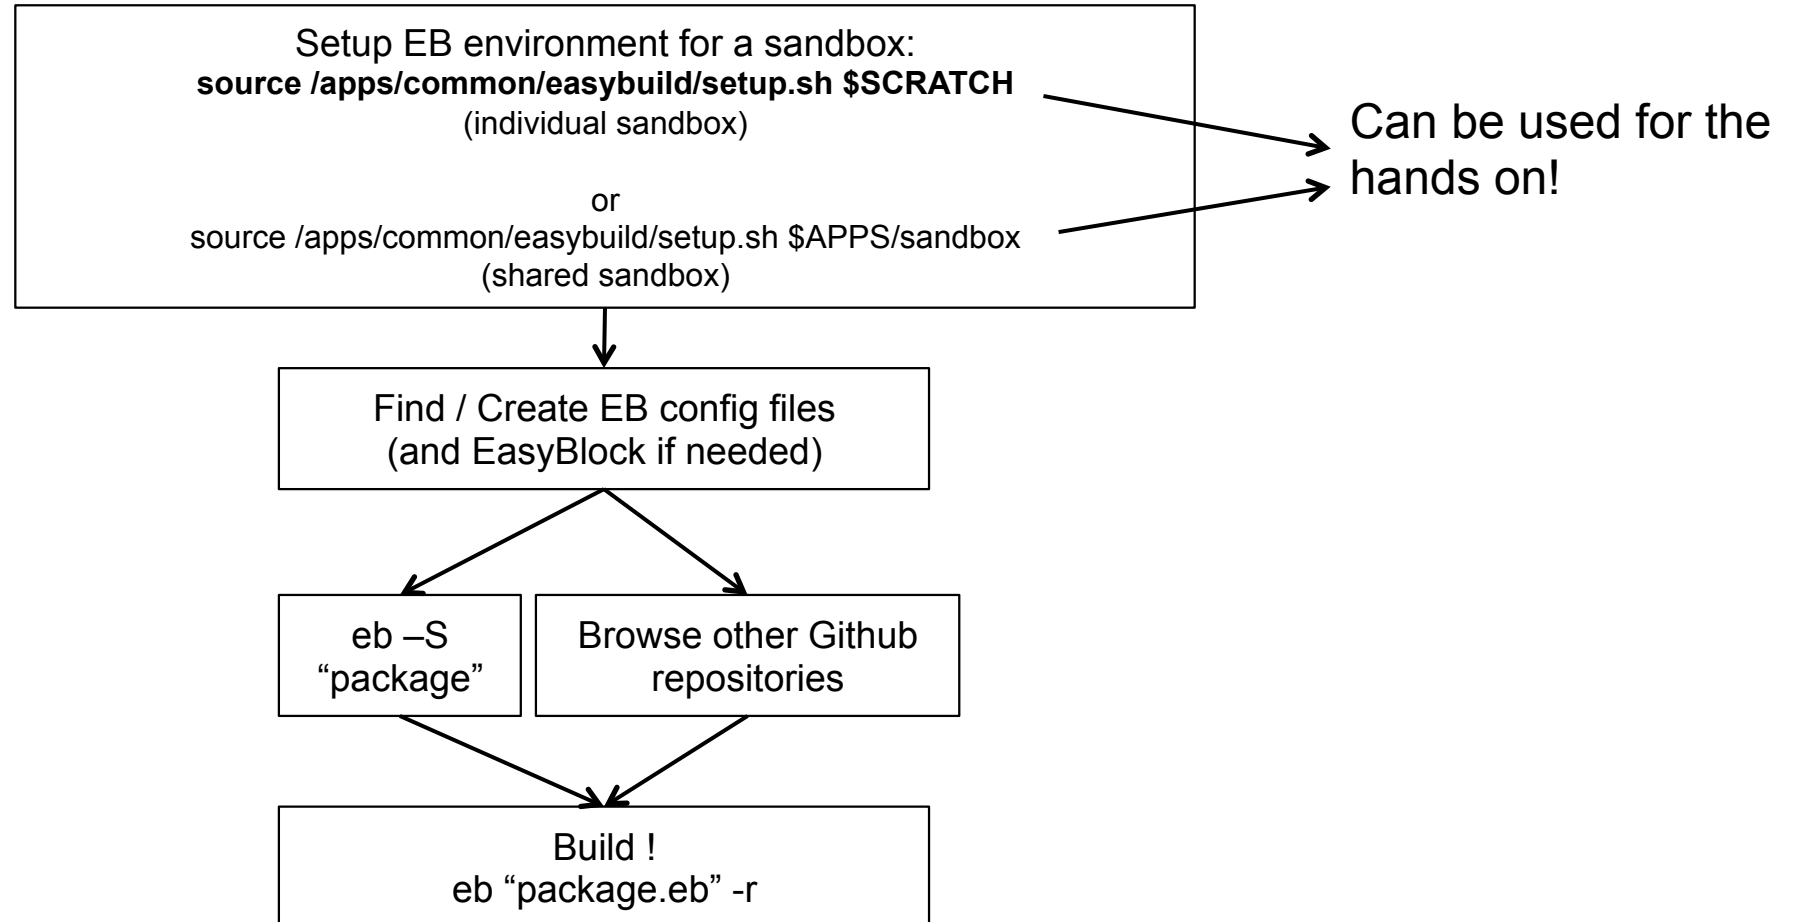

Remarks:

- Full list available with:
 - `eb --list-toolchains`
- GNU = GCC + binutils
- Since 2015b, foss and intel actually use GNU instead of GCC
 - so they secretly include binutils ;)
 - (not listed here but visible on the eb files)

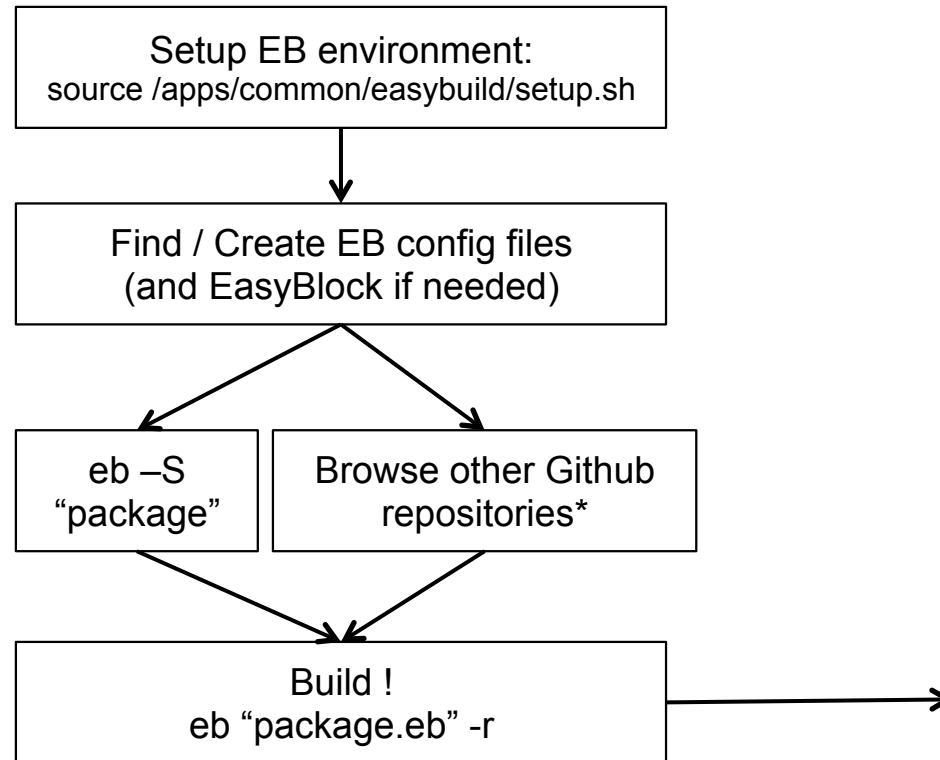

EasyBuild setup @ CSCS

Proposed EasyBuild workflow for development (usable by all CSCS)

Proposed EasyBuild workflow for production builds (SCS):

What will happen:

- Build (+dependencies)
- Install
- Create module files
- If successful
 - Commit easyconfig file to CSCS Git repository!!
 - Thanks to
 - Jens T. for Git support
 - Pablo E. for helping w/ setup

*Links on the last slide

Python use case

- Supported modules for Python 2 and 3
 - Setuptools 17.1.1, Pip 7.0.3, Nose 1.3.7, Numpy 1.9.2, Scipy 0.15.1, mpi4py 1.3.1, Cython 0.22, Six 1.9.0, Virtualenv 13.0.3, pandas 0.16.2, h5py 2.5.0 (serial/parallel), Matplotlib 1.4.3, pyCuda 2015.1, netcdf4 1.1.8
- Example Easyconfig files (for Python 2.7.10 on Cray)
 - Python-2.7.10-CrayGNU-5.2.40.eb
 - matplotlib-1.4.3-CrayGNU-5.2.40-Python-2.7.10.eb
 - netcdf4-python-1.1.8-CrayGNU-5.2.40-Python-2.7.10.eb
 - h5py-2.5.0-CrayGNU-5.2.40-Python-2.7.10-parallel.eb
 - h5py-2.5.0-CrayGNU-5.2.40-Python-2.7.10-serial.eb
 - pycuda-2015.1-CrayGNU-5.2.40-Python-2.7.10.eb
- Easyblocks
 - h5py.py, netcdf_python.py, pycuda.py

Now available on:

- Daint, Dora, Santis, Brisi (CrayGNU)
- Pilatus, Castor (foss)
- **Escha, Kesch (gmvolf) *new***

MCH CS-Storm use case (gmvolff/2015a)

- Autoconf/2.69
- Automake/1.15
- Autotools/20150215
- binutils/2.25
- Bison/3.0.3
- Boost/1.49.0
- bzip2/1.0.6
- CDO/1.6.9
- CMake/3.2.2
- Cube/4.3.2
- cURL/7.40.0
- ddt/5.0(default)
- Doxygen/1.8.9.1
- FFTW/3.3.4
- flex/2.5.39
- freetype/2.5.5
- GCC/4.8.2
- gettext/0.18.2
- GLib/2.34.3
- gmvapich2/2015a
- gmvolff/2015a
- GSL/1.16
- HDF/4.2.8
- HDF5/1.8.15
- JasPer/1.900.1
- Java/1.7.0_80
- libffi/3.0.13
- libjpeg-turbo/1.4.0
- libpng/1.6.16
- libreadline/6.3
- libtool/2.4.6
- libxml2/2.9.1
- M4/1.4.17
- matplotlib/1.4.3
- MVAPICH2/2.0.1_gnu48
- NASM/2.11.06
- NCO/4.5.1
- ncurses/5.9
- ncview/2.1.5
- netCDF/4.3.3.1
- netCDF-Fortran/4.4.2
- netcdf-python/1.1.8
- OPARI2/1.1.4
- OpenBLAS/0.2.13
- OTF2/1.5.1
- Python/2.7.10
- R/3.1.3
- Ruby/2.2.2
- ScaLAPACK/2.0.2
- Scalasca/2.2.2
- Score-P/1.4.2
- SQLite/3.8.8.1
- Szip/2.1
- Tcl/8.6.3
- UDUNITS/2.1.24
- zlib/1.2.8

Jenkins

- Jenkins is a tool designed for continuous integration/validation
- But it is much more powerful than that
 - Thousands of plugins are available
 - Can be easily configured to run tasks by ssh anywhere
 - You get logs for all of your executions for free
 - Info for running / past jobs and logs are always accessible through the web interface
- Some usage examples:
 - Development/Integration:
 - Checkout svn/git repositories to automatically build on different platforms
 - Validation
 - Periodically run unit tests
 - Monitoring
 - Periodically run sanity and performance tests (***regression***)
 - Run your favorite script or app
 - Use your creativity (example at CSCS: driving the acceptance of MCH machine)

Jenkins example: Monitoring scratch performance for apps (netcdf5)

Build Time Trend

By [lucamar™](#)

Build	↑	Duration	Slave
#2		15 min	master
#3		16 min	master
#4		28 min	master
#5		30 min	master
#6		22 min	master
#7		20 min	master
#8		20 min	master
#9		20 min	master
#10		19 min	master
#11		17 min	master
#12		19 min	master
#13		18 min	master
#14		24 min	master
#15		18 min	master
#16		12 min	master
#17		11 min	master
#18		29 min	master
#19		39 min	master
#20		10 min	master

Jenkins example: Rebuilding all software stack for Escha/Kesch

S	W	Name ↓	Last Success	Last Failure	Last Duration	
		RegressionEBKesch	20 hr - #15	N/A	1 hr 49 min	

Build Time Trend

	Build ↑	Duration	Slave
	#11	1 hr 47 min	master
	#13	1 hr 49 min	master
	#15	1 hr 49 min	master

Jenkins + EB integration: workflow example for testing .eb files

- Testing new easyconfig files on all machines where the toolchain is available
- Workflow setup
 1. Create a folder accessible by jenscscs to store the .eb files
 - /path/to/eb-files/
 2. Create a jenkins project adding the target test systems
 - CrayGNU/5.2.40 = daint, dora, santis, brisi
 - foss/2015a = castor, pilatus
 3. Add the following commands to the “Execute shell”
 - `source /apps/common/easybuild/setup.sh`
 - `find /path/to/eb-files/ -name '*CrayGNU-5.2.40*.eb' -exec eb {} "-r -f" \;`
 - (foss/2015a: replace “*CrayGNU-5.2.40*” by “*foss-2015a*”)
- Usage
 1. Copy .eb files to /path/to/eb-files/
 2. Go to Jenkins and click on “Build now”

Jenkins: Example for testing .eb files

- /apps/common/tools/easybuild/jenkins/

- CrayGNU/5.2.40

- CDO-1.6.9-CrayGNU-5.2.40.eb
- NFFT-3.3.0-CrayGNU-5.2.40.eb

- foss/2015a

- Ghostscript-9.10-foss-2015a.eb
- HDF5-1.8.15-foss-2015a.eb

Jenkins: Example for testing .eb files

- /apps/common/tools/easybuild/jenkins/

- CrayGNU/5.2.40

- CDO-1.6.9-CrayGNU-5.2.40.eb
- NFFT-3.3.0-CrayGNU-5.2.40.eb

- foss/2015a

- Ghostscript-9.10-foss-2015a.eb
- HDF5-1.8.15-foss-2015a.eb

Red ball = tomato FAIL

Example projects available at jenkins.cscs.ch

- EasyBuildTest-foss
- EasyBuildTest-CrayGNU

Final thoughts

- Current installation is ready for application level
 - Validation with Python use case (including modules)
 - Daint, Dora, Santis, Brisi, Pilatus, Castor **and Escha/Kesch (new)**
- Continuous validation techniques can be easily applied
 - Testing builds across all systems with Jenkins
 - Changes/errors on the PrgEnv can be detected early
- In order to get the most out of EasyBuild
 - We need to have consistent PrgEnv on most systems
 - OK on Cray systems
 - Not currently true on non-Cray
 - Achievable with EasyBuild

Next steps (SCS)

- Try out EB for answering tickets requesting new software
 - Testing and feedback are very welcome
 - Can also be used to answer individual user requests
 - Builds that won't be officially supported
 - Such as the famous RT ticket “#19610: nano editor for dora”
- Agree on toolchains for non-Cray systems
 - Stock toolchain (foss + intel for example)
 - Default “foss” toolchain works just fine for Python use case
 - May be not optimal on all archs (for example concerning MPI)
 - Tailored toolchain using existing PrgEnv (supported by HPC Operations team)
 - This approach was used on the new Storm MCH (gmvolf)
 - We might end up with a different toolchain on each system
- Start contributing back
 - Create GitHub Pull Requests for new easyconfig files
 - Help to develop and test the stable Cray support
